

Aphrometers

The aphrometers (Pressure gauges) enable to control inside pressures after drawing off. Various models are available according to the types of stoppers.

Simplified pressure gauge 0/10 Bar.
Simplified pressure and vacuum gauge -1 /+ 1.5 Bar.

Controls the pressure on the stoppered bottles on a level with the ring. Stainless steel gauge 0/10 Bar

Controls the pressure and vacuum on the stoppered bottles on a level with the ring. Stainless steel gauge -1/+1.5 Bar

Permanent capsule pressure gauge. 0/10 Bar

Controls instant pressure of bottles with capsules with a tinned iron and aluminium-stainless steel alloy crown with or without plastic stopper.

Stainless steel gauge 0/10 Bar

Stopper pressure gauge for sparkling wine. 0/10 Bar

Controls the development of pressure permanently or intermittently of sparkling wines with crown and cork or plastic stopper.
Stainless steel gauge 0/10 Bar
